## Hexavalent Chromium Compliance Statement

Kaiser Tool Company purchases metals from a variety of sources. As a manufacturer of finished products, using raw materials produced by other companies, Kaiser Tool Company is dependent on our suppliers to certify composition of raw materials. After engaging in due diligence with our suppliers, we are not aware of the inclusion of Hexavalent Chromium in our products. We will continue working with our suppliers as necessary to assure that our products remain Hexavalent Chromium free.

Thank you for the opportunity to address your concerns. We appreciate your business.
